

Fleet On-Site Technical Training

3.0 L, 6.7L Diesel

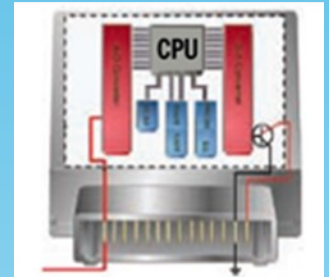

Escape/Fusion/MKZ Hybrid

Automatic Transmission

ABS/Roll Safety

Electrical/Electronics

Ford Motor Company knows how important it is for you to keep your fleet on the road. If your vehicles are maintained through in-house facilities, Ford offers the following fleet-specific technical training courses on-site at your location.

3.0 + 6.7L Power Stroke® Diesel (2 Days) Provides theory and operation of diesel systems including high-pressure oil system, low-and-high-pressure fuel system and engine controls. Includes drivability diagnosis using IDS and PC/ED diagnostic routines

Hybrid Utility Police Interceptors (2 Days) Provides skills and knowledge to diagnosis and repair Hybrid Police Interceptor.

Anti-lock Brakes (1 Day) Provides skills and knowledge to diagnose and perform basic repairs on Ford vehicles equipped with anti-lock brakes.

Hybrid Vehicles (2 Days) Provides hands-on skills to diagnose and repair Hybrid vehicles in a safe and effective manner. It is strongly recommended the technicians attending this course already have Electrical/Electronics training or experience.

Electronic Auto Trans Diagnosis & Repair (1 Day) Provides skills and knowledge to perform basic repairs on vehicles equipped with electronic automatic transmissions.

Engine Performance (2 Days) Provides skills and knowledge required to perform engine performance diagnosis and repairs on Ford vehicles. Includes OBD II monitors and related strategies.

Electrical/Electronics Overview (2 Days) Provides fundamental knowledge and diagnosis of Ford electrical and electronic components and systems.

IDS/FDRS Diagnostic System (1 Day) Provides familiarization and basic operation training on laptop-based Integrated Diagnostic System (IDS). Course can be tailored to meet fleet needs equipped with PDS.
